Technical specifications

Materials

Lower shade: Spun steel.
Other shades: Spun aluminum. Struts: Rolled aluminum. Diffuser: Frosted glass.

Finishes

The metal surface is raw after being stripped of previous paint. As a result of the stripping process, the finish of the aluminum surface naturally varies between darker and lighter tones. The lower shade is made of steel and has a different surface that may encounter occasional rust.

Mounting

12'. 3-conductor, 18 AWG cloth-covered power cord.
White canopy included. For mounting instructions, see download section on the product detail page.

Information

The shades may appear with small irregularities, crookedness, and dents.

Please note that the metal surface is treated with a dry lubricant to prevent further patination. The lower steel shade will corrode over time unless it is treated further.

If preferred, applying a dry lubricant every now and then will help maintain the original raw- metal finish. Mounted over the dining table in a small, hip city apartment kitchen—or in a row above a long kitchen table in a classic and stylish house—the PH 5 Retake provides a cozy ambiance with a truly modern edge. Merging retro with contemporary, the PH 5 Retake is also a perfect fit for sharp up-and-coming retail environments, bars, and restaurants. For the E-socket product variants, bulbs are not included. LED light source is part of the product.

Variant Options

For particular variant options, please check our online Product Variants Configurator on the product detail page.
