Description

In his quest to add movement to the surface, designer Alain van Havre started layering and combining triangular shapes. Before he knew it he had created a visually enticing composition out of teak and the Graphic design was born. By using multiple layers, a sense of depth and dynamism is created in the intricate arrangement. Motion and warmth are added by further perfecting the natural attributes of wood.

This Graphic sideboard features 3 doors and 2 adjustable shelves

Designer Alain Van Havre

For Alain van Havre, inspiration is everything. Deeply connected to his environment and passionate about natural materials, he has developed an exceptional expertise for woodworking. Over the years, he has created his own visual language centred around form, a translation best described in collections such as the Bok, Graphic, Pl, and Stairs. He believes that for someone to connect with a design, it is important to bring it closer to nature. Over the past 20 years Alain has played a pivotal role in influencing the Ethnicraft designs we know and love today.
